***Response to Amendment***

1. Applicant's amendment received on March 27 2007 in which claims 7 and 8 were amended has been fully considered and entered but the arguments are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Mayhew (US Patent no. 5,510,831).

Regarding claims 1, and 6-8, Mayhew discloses the same image processing apparatus comprising first detecting means for detecting image pairs each taken in a continuous shooting mode among a plurality of images (See col. 2, lines 47-49) second detecting means for detecting image pairs each taken consecutively within a predetermined time among the plurality of images (See col. 2, lines 49-53), presenting means for presenting, to a user the image pair detected by at least one of the first detecting means or the second detecting means (See col. 2, lines 59-61), and generating means for

setting one of the two images comprising a selected image pair selected by the user among the image pairs presented by the presenting means as an image for the left eye and the other one of the two images as an image for the right eye, and generating image data for displaying a stereoscopic image (See col. 2, lines 53-59 and col. 4, lines 49-56).

As per claims 2-3, most of the limitations of these claims have been noted in the above rejection of claim 1. In addition, Mayhew further determines a degree of similarity between the two images (See col. 9, lines 36-44).

As per claim 4, most of the limitations of this claim have been noted in the above rejection of claim 1. In addition, the user operation is further disclosed in Mayhew col. 5, lines 11-21.

As per claim 5, most of the limitations of this claim have been noted in the above rejection of claim 1. In addition, Mayhew provides a recording medium in fig. 8, item 28.
